About Del Group

Origin.

Del Group was formed in 2017 by a dynamic group of people with a focus on delivering services in the water, gas and electrical maintenance sectors.

From humble beginnings of installing electrical and water meters the company has diversified into a multi-service organisation specialising in plumbing, electrical, electrical fencing, gas, solar, paving, roof sealing and general maintenance on small to medium enterprises.

Our team consists of trained professionals in their respective fields and they have a passion for their day to day duties.

Although the world has changed in recent years we can only go from strength to strength in these ever evolving times and by making service and quality workmanship our top priority we believe we are capable of delivering the best for our clients.

Introduction

What we stand for.

Del group has always strived to form part of the wider community. It has always been our belief that our quality of work and code of ethics be at the forefront of our business model.

We strive to service all customers from the university rental tenant to the multinational organisations, whether it be a earth leakage fault to large plumbing emergencies our policies remain the same: quality service at market related fees.

Vision.

Del Group's vision is to create a responsible and sustainable business for our employees by adding value to our local and broader communities.

Mission.

Our mission is to ensure excellent customer satisfaction with quality workmanship and consumer trust in our company as the driving force behind our name, Del Group.

Electrical

Based in the Central region of South Africa our client base ranges from residential, commercial and agricultural to industrial and governmental. This has ensured that all our accreditation and qualifications are up to date with the latest SANS 1014/2

Construction.

We are no strangers to the construction sector, with recent renovations to restaurants and commercial properties our track record speaks for itself. From new developments to retrofitting our team is always ready for the challenge.

Metering.

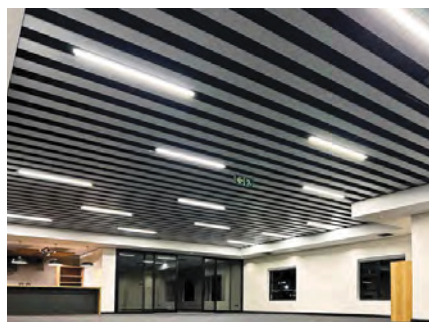

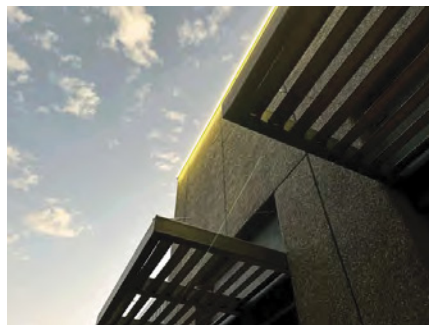

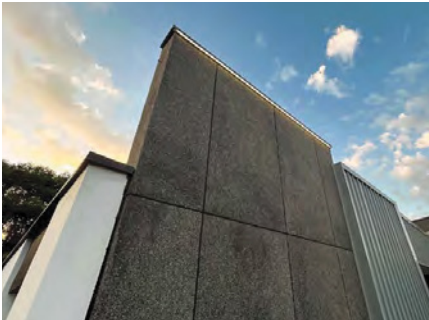

Del Group started it's journey in the meter installation industry, needless to say that the experience gained from this has put us at the forefront as the installer of choice for many of the metering and billing companies in and around the Central region. We specialise in a wide range of smart meters and programming to conventional prepaid meter installations.

Maintenance.

Maintenance is arguably our largest portfolio at the moment. Our teams are constantly on call to assist commercial properties, body corporates, insurance companies and managing agents with maintenance related enquiries. Our friendly office staff is always at hand to provide customer satisfaction.

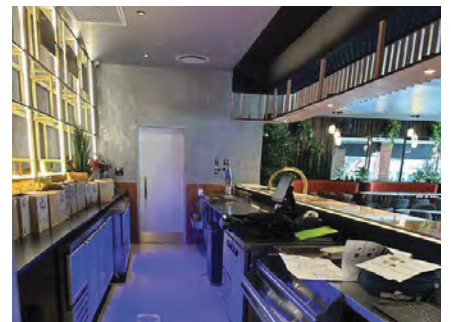

Electrical Installations

Zatara Property Group (Preller Plein, Dan Pienaar Bloemfontein)

Electrical Installations

News Cafe (2nd Ave, Westdene, Bloemfontein)

Renewable Energy

Solar.

This ever increasing market has allowed us to gain valuable experience over the past couple of years and has placed us as the preferred installer for EPC's, Solar Funders and Solar Companies. Our installations showcase accuracy and efficiency by completing projects timeously and within the customers budget.

Our team has the experience and knowhow to assist clients from the initial site visit, design phase to quotations and delivery. We are proficient in all solar fields from grid-tie systems to off-grid and generator integration.

Installation of all major brands and Tier1 products is our forte and our commitment to our customers.

Plumbing

Del Group is a proud IOPSA member and we are continuously equipping our artisans with the latest skills and development as required in order for them and the company to retain our qualified status.

Our artisans have a wide range of skills and experience. From new construction and renovation to emergency call outs for those leaky pipes.

Our maintenance department is always on call to assist with any emergency, our turnkey approach gives our customers a hassle-free experience from tiling down to the lavatory and basin installation.

- Construction
- Maintenance

- Drain Jetting

Roof Sealing

This is an exciting new service the Del Group offers. We have teamed up with Rubberproof Liquid Rubber, a DWASA member to offer an alternative to the market. Our highly trained personnel are manufacturer accredited to deliver an outstanding product to hold up to the 10 year warranty offered by Rubberproof Liquid Rubber.

No matter the size of the project, large or small, our team is always ready to assist with a leaky roof. For more information on this amazing product, please visit **www.rubberproof.co.za**

Maintenance

We offer a wide range of general maintenance service:

Electrical

- Cleaning and servicing of substations
- Cleaning and servicing of solar plants

General

- Trenching and paving
- Servicing and replacing gutters
- Installation of tanks and pressure pumps

Electrical Fencing

Del Group specialises in high-quality electric fencing installations for residential, commercial, and industrial properties.

We offer secure perimeter solutions using SABS-approved materials, professional workmanship, and smart integration with alarm systems. Whether it's for added protection at home or safeguarding a large facility, our team ensures a durable, compliant, and tamper-resistant installation from start to finish.

Clear View Fencing

SMA/Just Beef - Clear View - 12 Strand Electrical Fence

Our Clear View fence integrated with a 12-strand electric fence offers the perfect blend of visibility, strength, and high-voltage security. This modern solution provides an unobtrusive, tamper-resistant barrier designed for maximum protection without compromising aesthetics.

Electrical Fencing

Zeelies Farm - 26 Strand Electrical Fence

Del Group installed this 26-strand electric fence with integrated gate installations for a 3.2MW Plant, delivering the perfect blend of visibility, strength, and high-voltage security.
